email: vbpsgzb@yahoo.com

Date: 26/05/2026

Subject: Important information regarding Summer Engagement Work (2026-27)

Dear Parents,

Holidays are always a welcome break from the normal routine and we all look forward to them. If appropriately used, it can reinforce students' learning, contribute to their progress and cultivate a healthy disposition towards holistic growth.

Holiday Homework is not

- Just to keep the children busy all the time.
- To make them learn content and reproduce it.
- To tax them with an assignment just for the sake of it.

Instead it is about

- To engage them in constructing knowledge, exploration and research.
- To encourage them in creating their own learning spaces outside the school environment.
- To develop a daily and weekly schedule of homework and other activities of your child.
- To be the guiding force and avoid tutoring to encourage self-learning.
- To do self-analysis in terms of valuable feedback.

Keeping this objective in mind, our dedicated teachers have carefully calibrated and designed the Summer Engagement Work based on 17 Sustainable Development Goals for our 21st Century learners. It will be a useful mechanism to check the mastery of concepts and skills in varied areas and its application in different contexts.

We would advise you to make your plans in such a way that children visit places of historical/cultural importance. They may also be taken to the places where they can see countryside, agricultural practices and other realities of our social structure.

1. Take time out and visit orphanage, home for the aged and explain to them about those places.
2. Give them saplings and ask them to plant them and water them and see them grow. Encourage them by saying that they will be presented with gifts for their good deeds.
3. Take them to your hometown/village and let them spend time with their grandparents, uncles, aunts, cousins. Let them experience the affection and good times of being with the family. Show them what is agriculture/farming and the difficulties a farmer goes through in providing the food that we are eating and that we should not waste food.
4. Make them sit by you and ask them what their needs are and satisfy some of the useful ones and explain them which ones are essential and which ones are not.
5. Do not get up late. Rise at the usual time and go for a walk or play a game that interests you.
6. Read books/newspaper with your parents/siblings. Keep yourself updated.
7. Find at least five new words every week and learn how to use them.
8. Do not spend time playing video games or using the smart phone.
9. Ensure that the family has at least one meal together and not in front of the television. Give them a feeling that you are there for them.

Summer Vacations:

From Saturday, 24th May 2026 to Wednesday, 1st July 2026 (Both days inclusive). The School will reopen on Thursday, 2nd July 2026.

General Guidelines

Vishwa Bharti Public School, Ghaziabad is determined to take transformative steps which are urgently needed to shift the world onto a sustainable and resilient path. Inspired by the 17 SDG's laid by the United Nations, our students have explored new milestones, by spreading and valuing the fragrance of awareness and actively contributing for their society. Continuing our endeavors, this year **Summer Engagement Work in each subject has been designed based on a Sustainable Development Goal.**

- **The Summer Engagement Work contains an Interdisciplinary Art Integrated Project in each subject.** Each subject has chosen a unique medium of presentation like models poster, flash cards, wall hanging etc. to help students explore and learn new things.
- **All the interdisciplinary activities would be assessed as a part of Subject Enrichment for Term 1.** All the subjects will be assessing it for 5 marks each.
- Your child's effort and creativity in the completion of the assigned work will be duly acknowledged and displayed at various platforms.
- **The holiday homework should be submitted after the holidays as per the schedule given below:**

S.no	Date	Subject
1.	Monday, 7 th July 2026	English, Hindi
2.	Tuesday, 8 th July 2026	Mathematics, Science
3.	Wednesday, 9 th July 2026	Social Science, Skill Subject, Art & Craft

We seek your support in our endeavors to realise our educational goals.

Wish you a very happy and enjoyable holiday season!

Working Together

Ms Dimple Puri

(Principal)

Theme – SDG 11

SUSTAINABLE CITIES AND COMMUNITIES

SDG 11: Sustainable Cities and Communities teaches students the importance of creating safe, inclusive, and eco-friendly living spaces. It encourages them to care for their surroundings, use resources wisely, reduce waste, and contribute to cleaner, greener neighbourhoods—helping them become responsible citizens who shape a better future for all.

General Instructions :

1. Summer Engagement work should be done as described subject wise. (A3 Sheets should have borders)
2. Assignment is self-directed learning. It also encourages time management, responsibility, and continuous learning during vacation.
3. Learning and practicing concepts done till now should be a part of your holiday regime.

S.N O	SUBJECT	SUMMER ENGAGEMENT WORK
1.	ENGLISH	<u>Theme: SDG Goal 11 – Sustainable Cities and Communities</u> General Guidelines (English Project & Portfolio 2026–27) ● Create two separate Cobra files: ● One for English Project ● One for English Portfolio ● Cover both files neatly with dark pink colour chart paper. ● Prepare a neat, creative, and well-organized English Project & Portfolio 2026–27. ● Use a Cobra file or any good-quality project file. ● Maintain proper sequence and clarity in presentation. ● Write all content in your own words. ● Support your work with relevant drawings, colours, cut-outs, charts, graphs, newspaper cuttings, or printed images. ● Include meaningful quotes related to learning and knowledge. ● You may also add illustrations inspired by chapters and poems from Kaveri. ● Focus on themes related to cities, nature, environment, and sustainability. ● Keep the work neat, meaningful, original, and visually appealing. ● Be creative and thoughtful, presenting ideas with clarity and compassion. ● Attach a short reflection paragraph at the end: ● What did you learn from this project? ● How you can contribute to building a sustainable city? ASSIGNMENT 1 (PROJECT): CITY CHRONICLES – IF LITERATURE COULD BUILD A CITY Learning Objectives: ● To encourage students to imagine how values, people, professions, and ideas from the book Kaveri can be used to design a sustainable city, thereby promoting literary understanding, innovation, design thinking, and environmental responsibility. ● To compare sustainable practices in Uttar Pradesh and Arunachal Pradesh under the initiative of Ek Bharat Shreshtha Bharat, fostering awareness of cultural diversity and sustainable development practices. Materials Required: ● A4 sheets ● Sketch pens/colours ● Old newspapers ● Photographs/drawings ● Recycled decorative materials

Cover Page Instructions

Design an attractive cover page and include:

- **Title:** English Project 2026–27
- Student's Name
- Class & Section
- Roll Number
- School Name

TASK: CREATE YOUR “SUSTAINABLE CITY BLUEPRINT FILE”

Students will create a creative city-planning file where each chapter contributes one part of an ideal city.

Page 1: The Learning Corner

(From- How I Taught My Grandmother to Read)

Activity-Create a page titled:

“A City That Learns Together”

Include:

- draw a community reading centre
- intergenerational learning ideas
- literacy campaign poster
- 5 slogans promoting education for all

Example:

“An educated citizen builds a stronger community.”

Page 2&3: The Skill Street

(From- The Pot Maker)

Activity: Design “Vocation Street”

Create an illustrated marketplace titled Vocation Street, showing how traditional skills support communities.

Include:

- potters
- bamboo artisans
- weavers
- toy makers
- local crafts
- handmade eco-products
- sustainable livelihoods

Art Integration

Connect the project with the traditional crafts of Arunachal Pradesh & Uttar Pradesh:

Arunachal Pradesh

- Show bamboo craft, cane work, handwoven textiles, and tribal handicrafts.
- Highlight how local communities use natural resources sustainably.

Uttar Pradesh

- Show Khurja pottery, clay work, terracotta, and village artisans.
- Highlight traditional occupations connected to local economy and culture.

Writing Task:

Write a short paragraph (100–120 words) explaining how traditional occupations in Arunachal Pradesh and Uttar Pradesh preserve cultural heritage, create employment opportunities and contribute to sustainable communities.

Reflection:

Write a reflection paragraph (100–120 words) on:

What did you learn about traditional occupations from The Pot Maker and how do they help in building sustainable communities today?

Page 4: Poetry Mural Wall

Use lines from:

- **Bharat Our Land**
- **Gifts of Grace**
- **Canvas of Soil**

Create a Poetry Mural Wall titled:

“Voices of My Sustainable Nation”

Add:

- poetic lines
- illustrations

- symbols of community
- poetic devices chart

Poetic Device	Example
Imagery	soil, rivers, fields
Personification	nature speaking
Symbolism	land, work, unity

Page 5: Letter to the Editor

Write a creative letter (100-120 words):

Include:

- suggestions to improve your city
- ideas inspired from lessons
- your role as a young citizen

Page 6: Reflection

Write:

- Which chapter inspired you most?
- What did you learn about sustainability?
- How can literature help solve real-life problems?

ASSIGNMENT 2 (PORTFOLIO) : MY WORLD OF WORDS

Learning Objectives

- To enhance students' reading, writing, and creative expression skills.
- To develop the ability to connect literature with real-life situations.
- To encourage imagination, critical thinking, and originality in presentation.

Cover Page Instructions

Design an attractive cover page and include:

- **Title:** English Portfolio 2026–27
- **Subtitle:** My World of Words
- Student's Name
- Class & Section
- Roll Number
- School Name

Task :Portfolio Activities (Literature-Based)

Page 1: Self-Introduction

	Write a short paragraph about yourself including: • Name and brief introduction • Date of Birth • Height • Weight • Hobbies • Ambition • Role Model • Strengths • Weaknesses Page 2: Portfolio Activities (Literature-Based) Page 3: How I Taught My Grandmother to Read Task: Write a diary entry from the grandmother's point of view after learning to read. Visual: Draw or paste a village reading scene. Focus: Importance of literacy and lifelong learning. Page 4: The Pot Maker Task: Describe a traditional craftsperson or conduct a short interview with an artisan. Visual: Pottery or handmade craft illustrations. Focus: Value of traditional skills and heritage. Page 5: Winds of Change Task: Create a collage on environmental change and sustainable living. Visual: Renewable energy, green cities, trees, and nature. Focus: Awareness of environmental responsibility. Page 6: Bharat, Our Land Task: Write a short paragraph or create a patriotic poster on India's culture and beauty as described in the poem. Visual: Monuments, rivers, festivals, and map of India. Focus: Love and respect for the nation. Page 7: Reflection Write 4–5 lines covering: • What I learned from this activity • What message or value I understood • How it connects to real life • What I enjoyed the most Learning Outcomes: Students will: • apply literary concepts to real life • connect education with SDG 11 • explore creative urban planning
--	---

		● improve design and writing skills ● develop civic awareness Assessment Criteria- (Total: 5 Marks) <table> <tr> <th>Criteria</th><th>Marks</th><th>Description</th></tr> <tr> <td>Content & Effort</td><td>2</td><td>Relevance, competition of assignments and overall effort shown</td></tr> <tr> <td>Language & Accuracy</td><td>1.5</td><td>Correct grammar, sentence structure and appropriate vocabulary</td></tr> <tr> <td>Presentation & Neatness</td><td>1.5</td><td>Neatness, creativity, organization and visual appeal of the work</td></tr> </table>	Criteria	Marks	Description	Content & Effort	2	Relevance, competition of assignments and overall effort shown	Language & Accuracy	1.5	Correct grammar, sentence structure and appropriate vocabulary	Presentation & Neatness	1.5	Neatness, creativity, organization and visual appeal of the work
Criteria	Marks	Description												
Content & Effort	2	Relevance, competition of assignments and overall effort shown												
Language & Accuracy	1.5	Correct grammar, sentence structure and appropriate vocabulary												
Presentation & Neatness	1.5	Neatness, creativity, organization and visual appeal of the work												
2.	HINDI	सतत शहर और समुदाय गतिविधि 1-“सतत शहर और समुदाय” (स्मार्ट सिटी) पोस्टर तैयार करें। (अनुक्रमांक -1 से 10 तक) उद्देश्य (Learning Objective:) ● छात्रों में सतत विकास और पर्यावरणीय जागरूकता को बढ़ाना। ● छात्रों को यह समझाना कि एक सतत शहर में कौन-कौन से तत्व होते हैं। ● समुदाय और पर्यावरण के बीच संतुलन बनाए रखने के उपायों की पहचान करना। ● सामाजिक जिम्मेदारी और नागरिक कर्तव्यों के प्रति जागरूकता विकसित करना। ● छात्रों को "शून्य अपशिष्ट" (Zero Waste) की संकल्पना से परिचित कराना। ● विद्यालय परिसर को स्वच्छ, पर्यावरण-मित्र और अपशिष्ट-मुक्त बनाना। ● पुनर्चक्रण (Recycling), पुनः उपयोग (Reuse), और जैविक अपशिष्ट प्रबंधन (Composting) को बढ़ावा देना। सामग्री (Material Required) ● चार्ट पेपर, स्केच पेन, रंगीन पेंसिल ● इंटरनेट / पुस्तकालय की जानकारी ● अखबार / पत्रिका की कटिंग ● पुनः उपयोग की गई वस्तुएँ (जैसे प्लास्टिक बोतल, कार्डबोर्ड आदि)												

- **सहायक बिंदु (Support Point)**
- शहर की समस्याओं की पहचान करें जैसे - ट्रैफिक, प्रदूषण, जल संकट आदि।
- ग्रीन बिल्डिंग्स, सार्वजनिक परिवहन, सौर ऊर्जा, कचरा प्रबंधन आदि दर्शाए जाएं।
- स्थानीय समुदाय में सतत विकास के प्रयासों पर एक रिपोर्ट तैयार करें (100 शब्दों में)।

गतिविधि 2- "Zero Waste at School" (शून्य अपशिष्ट विद्यालय)

मेरी हरित पाठशाला पर मॉडल बनाए। (अनुक्रमांक -11 से 21 तक)

सामग्री (Material Required)

- चार्ट पेपर, स्केच पेन, कैंची, गोंद
- रिसायकल की गई वस्तुएं (प्लास्टिक बोतल, डिब्बे, कागज आदि)
- विद्यालय परिसर की तस्वीरें (यदि संभव हो)
- प्रोजेक्ट रिपोर्ट लिखने के लिए पेपर

shutterstock.com · 2188866683

सहायक बिंदु (Support Point)

- गीले और सूखे कचरे के लिए अलग-अलग डस्टबिन
- " 'नो प्लास्टिक डे' या 'ग्रीन डे' का आयोजन
- विद्यालय में उत्पन्न कचरे को कम से कम करना या पूरी तरह समाप्त करना।
- ग्रीन ब्रिगेड (छात्रों की एक टीम) का गठन

निर्देश: (Instructions)

- कार्य सुंदरता और स्वच्छता के साथ करें।

- चित्र, तालिका और हिंदी भाषा का सुंदर उपयोग करें।
- चित्रों या मॉडलों में रचनात्मकता दिखाएं।
- रिपोर्ट में स्पष्ट और सरल भाषा का प्रयोग करें।
- समय सीमा का पालन करें (प्रोजेक्ट जमा करने की तिथि)।

अधिगम के परिणाम (Learning Outcomes)

- इस अवकाश गृहकार्य के माध्यम से छात्र:
 - रचनात्मक लेखन, शब्दावली निर्माण, और पठन-बोध गतिविधियों में भाग लेकर अपनी हिंदी भाषा कौशल को बेहतर बनाएंगे।
 - कला और लेखन के माध्यम से अपने ज्ञान और समझ को रचनात्मक रूप से प्रस्तुत करना सीखेंगे।
 - वे यह सीखते हैं कि किस तरह अलग-अलग कारक गरीबी को प्रभावित करते हैं - जैसे शिक्षा, स्वास्थ्य, रोजगार आदि।

मूल्यांकन-

मूल्यांकन(Evaluation)	अंक
• विषय की समझ व प्रस्तुति	1
• रचनात्मकता व कल्पनाशक्ति	1
• सामग्री का सही उपयोग	1
• साफ-सफाई और सुंदरता	1
• समय पर जमा करना	1
कुल अंक	5

3.	MATHS	<u>Theme: SDG Goal 11 – Sustainable Cities and Communities</u> <u>Learning Objective:</u> 1. To understand how mathematics supports sustainable planning for cities and communities. 2. To explore population data, urban infrastructure, and transportation through mathematical tools like graphs and statistics. 3. To encourage creative and analytical thinking about future-ready and eco-friendly urban development. 4. To compare sustainable practices in Uttar Pradesh, Arunachal Pradesh, and Meghalaya under the <i>Ek Bharat Shreshtha Bharat</i> initiative. <u>Instructions:</u> 1. Use A3 and A4 sheets with neat, creative presentation. 2. Support your work with graphs, charts, diagrams, or newspaper cuttings. 3. Include regional elements (folk designs, art forms) from Arunachal Pradesh and Meghalaya. 4. Roll number-wise project task allocation is listed below. <u>Material Required</u> • Graph paper (for plotting) • A3 and A4 sheets • Scale, pencils, sketch pens/crayons • Printouts or cuttings (optional) • Map/outline of Indian states for decoration • Data on urban population or transport (from newspaper/internet/books) <u>Task 1 – Urban Population Growth Analysis (All Students)</u> • Collect population data of any 3 major cities, one from each state. • Represent the last 3 census values (e.g. 2001, 2011, 2021 estimated) using a bar graph. • Suggest one sustainable solution for each city on A4 size sheet (like public transport, waste management). • Decorate with state symbols/art from Arunachal and Meghalaya. <u>Task 2 –Poster: Smart & Sustainable City Features</u> (Roll Numbers 1–10) Theme: “<i>Future Cities = Green Cities</i>” Create a poster including: • Elements of a smart city (solar lights, cycle lanes, green parks, waste recycling) • Math-based visuals: area usage, pie charts of land distribution • Slogans like: • “Clean, Green, and Smart” • “Cities that Care, Cities that Share”
----	-------	---

		• Add real-life examples from cities in UP, Arunachal Pradesh, and Meghalaya. <u>Task 3 –Poster: Public Transport = Sustainable Future</u> (Roll Numbers 11–20) Theme: “<i>Ride Smart, Live Smart</i>” Create a poster showing: • Benefits of public transport (less traffic, less pollution) • Compare fuel cost of private vs. public transport (use basic maths for weekly/monthly travel) • Bar graph to show CO₂ emissions by vehicle type • Add slogans like: • “Bus Today, Better Tomorrow” • “Go Green, Use Clean Transport” • Use symbols or vehicle art from paired states for decoration. <u>Learning Outcomes</u> • Understand population trends and urban growth using mathematical graphs • Apply concepts of statistics and ratio in real-life urban contexts • Build awareness of sustainable living and transport • Encourage regional pride through cultural representation • Improve presentation, analysis, and creative thinking Assessment Criteria (Total: 5 Marks) <table border="1"> <thead> <tr> <th>Criteria</th><th>Marks</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Mathematical Accuracy</td><td>1</td><td>Correct use of graphs/data/calculations</td></tr> <tr> <td>Relevance & Understanding</td><td>1</td><td>Shows understanding of sustainability and urban planning concepts</td></tr> <tr> <td>Creativity & Visual Appeal</td><td>1</td><td>Poster/chart is colourful, clear, and uses decorative/cultural elements</td></tr> <tr> <td>Neatness & Completion</td><td>2</td><td>Work is clean, fully done, and meets all given instructions</td></tr> </tbody> </table>	Criteria	Marks	Description	Mathematical Accuracy	1	Correct use of graphs/data/calculations	Relevance & Understanding	1	Shows understanding of sustainability and urban planning concepts	Creativity & Visual Appeal	1	Poster/chart is colourful, clear, and uses decorative/cultural elements	Neatness & Completion	2	Work is clean, fully done, and meets all given instructions
Criteria	Marks	Description															
Mathematical Accuracy	1	Correct use of graphs/data/calculations															
Relevance & Understanding	1	Shows understanding of sustainability and urban planning concepts															
Creativity & Visual Appeal	1	Poster/chart is colourful, clear, and uses decorative/cultural elements															
Neatness & Completion	2	Work is clean, fully done, and meets all given instructions															
4.	SCIENCE	Theme: Sustainable Cities and Communities Roll No. 1-6: Smart Traffic Management System Problem Addressed: Traffic congestion and unnecessary fuel wastage. Material Required: Cardboard roads, LED lights, Arduino/simple circuit, Toy vehicles Procedure :															

- Create a road intersection model.
- Install automatic traffic signals.
- Demonstrate sensor-based signal timing.
- Explain reduction of traffic and pollution.

Design Your Own Sustainable City (Model)

All the models are allotted role no. wise (7-12). Students have to present their work on power-point along with the model in July'26.

1. Smart Cities: (Roll No. 7-8)

- Design your dream sustainable home using natural materials like clay, terracotta, cow dung, calcium carbonate or *chuna*. Show that the infrastructure is using maximum natural resources and recyclable products.

<https://www.smartcityindore.org/>

<https://www.ibef.org/government-schemes/smart-cities-mission>

2. Renewable Energy:(Roll No. 9-10)

Make a model using cardboard, waste materials, etc. Include:

- Solar-powered buildings
- Rainwater harvesting
- Bike lanes and public transport
- Waste segregation bins

<https://www.nesfircroft.com/resources/blog/seven-of-the-biggest-renewable-energy-projects-in-the-world>

3. Green Infrastructure: (Roll No. 11-12)

Justify the slogan 'Smart City, Green City' by live green project. How will you build a Green City? Implement your ideas in your model.

https://www.ctc-n.org/sites/www.ctc-n.org/files/session_7-2_green_infrastructure_projects_mr._ignacio_ortinez_0.pdf

Learning Outcome:

- Use of technology in urban planning.
- To create an opportunity to explore subjects in depth to learn core area of interest.
- To enhance critical thinking and creative thinking.
- Project-based tasks and experiential learning to spark creativity and imagination.

	● To learn time management, research analysis, and complete tasks independently. All the models are allotted role no. wise (13-20). Students have to present their work on power-point along with the model in July'26. To study the structure of an atom and understand the different atomic models proposed by scientists. Learning Outcomes After completing this project, students will be able to: 1. Understand the basic structure of an atom. 2. Identify protons, neutrons, and electrons. 3. Explain different atomic models. 4. Draw labeled diagrams of atomic models. 5. Develop scientific thinking and observation skills. 6. Relate science education to Sustainable Development Goals (SDGs). Materials Required ● A4 sheets / chart paper ● Pencil and eraser ● Colored pens or sketch pens ● Scale ● Glue and scissors ● Printed or hand-drawn diagrams ● Reference book / internet for research Introduction Everything around us is made up of tiny particles called atoms. Scientists developed different atomic models to explain the arrangement of particles inside an atom. These models helped in the development of modern science and technology.
--	--

Important Atomic Models

1. Dalton's Atomic Model

John Dalton proposed that atoms are tiny indivisible particles

2. Thomson's Atomic Model

J. J. Thomson discovered electrons and proposed the plum pudding model.

3. Rutherford's Atomic Model

Ernest Rutherford explained that atoms have a small dense nucleus.

4. Bohr's Atomic Model

Niels Bohr proposed that electrons revolve in fixed shells around the nucleus.

Analysis

- Atoms are made of subatomic particles: protons, neutrons, and electrons.
- Different scientists improved the atomic model over time.
- The Bohr model explained electron arrangement clearly.
- Modern atomic theory is based on continuous scientific research and experiments.

Conclusion

The study of atomic structure helps us understand matter and the development of modern science. Atomic models explain how particles are arranged inside atoms and how scientific ideas evolve with discoveries.

Assessment Criteria (Total : 5 Marks)

Criteria	Marks	Description
1. Scientific Accuracy & Relevance	1.5	The content presented is scientifically accurate and directly relates to the topic.
2. Creativity and Innovation	1.5	Shows original ideas, innovative solutions, or unique features in the model or presentation.

		<table> <tr> <td>3. Clarity of Presentation</td><td>1</td><td>Information is presented clearly and is easy to understand in both the PPT and model.</td></tr> <tr> <td>4. Visual Appeal and</td><td>1</td><td>The model and slides are well-organized, and neatly presented.</td></tr> </table>	3. Clarity of Presentation	1	Information is presented clearly and is easy to understand in both the PPT and model.	4. Visual Appeal and	1	The model and slides are well-organized, and neatly presented.
3. Clarity of Presentation	1	Information is presented clearly and is easy to understand in both the PPT and model.						
4. Visual Appeal and	1	The model and slides are well-organized, and neatly presented.						
5.	SOCIAL SCIENCE	<u>Theme: SDG Goal 11 – Sustainable Cities and Communities</u> <u>Learning Objective:</u> - To understand how sustainable city planning and effective communication can reduce the impact of disasters and improve resilience. <i>Task 1: Research & Write-Up Prepare a Scrap File (Roll No-1-9)</i> A. Sustainable Cities and Disaster Management - What are sustainable cities? - Why are they important in disaster-prone areas? - Features of a sustainable city that help in disaster management (e.g., green infrastructure, drainage systems, early warning systems) - Case study: A city that successfully used sustainable practices to manage a disaster (e.g., Tokyo, Rotterdam, Surat) B. Communication in Disaster Management - Role of communication before, during, and after disasters - Importance of awareness campaigns, emergency alerts, and disaster education - Use of technology: mobile alerts, sirens, radio, internet, and social media - Barriers to communication during disasters and how to overcome them <i>Task 2: Creative Activities (Roll No 10-18)</i> A. Poster or Model:(Poster on A-3 size paper or Model on Sustainable items) Topic:"My Sustainable City – Safe from Disasters" - Design a model or draw a city layout showing: - Green buildings - Emergency communication towers - Safe zones and evacuation routes - Water conservation and drainage systems B. Communication Plan Activity: - Imagine: A flood warning is issued in your area. - Create: A simple communication plan including: - Message content - Target audience (residents, schools, hospitals) - Methods to share it (SMS, radio, social media)						

		- Steps to take after sending the message Task 3: Reflection Questions: Write 5–6 lines each for: 1. How can you help build disaster-ready and sustainable communities? 2. Why is communication more powerful than panic during emergencies? Assessment Criteria (Total: 5 Marks) <table border="1"> <thead> <tr> <th>Criteria</th><th>Marks</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Creativity</td><td>1</td><td>Use of innovative ideas, presentation style, and artistic elements.</td></tr> <tr> <td>Content Quality</td><td>1</td><td>Accuracy, depth of research, and relevance of information.</td></tr> <tr> <td>Presentation</td><td>1</td><td>Neatness, organization, and clarity in the final submission.</td></tr> <tr> <td>Timely Submission</td><td>1</td><td>Homework submitted within the deadline.</td></tr> <tr> <td>Effort & Engagement</td><td>1</td><td>Demonstration of effort, originality, and enthusiasm in the project.</td></tr> </tbody> </table>	Criteria	Marks	Description	Creativity	1	Use of innovative ideas, presentation style, and artistic elements.	Content Quality	1	Accuracy, depth of research, and relevance of information.	Presentation	1	Neatness, organization, and clarity in the final submission.	Timely Submission	1	Homework submitted within the deadline.	Effort & Engagement	1	Demonstration of effort, originality, and enthusiasm in the project.
Criteria	Marks	Description																		
Creativity	1	Use of innovative ideas, presentation style, and artistic elements.																		
Content Quality	1	Accuracy, depth of research, and relevance of information.																		
Presentation	1	Neatness, organization, and clarity in the final submission.																		
Timely Submission	1	Homework submitted within the deadline.																		
Effort & Engagement	1	Demonstration of effort, originality, and enthusiasm in the project.																		
6.	AI	Activity 1 Create an “AI Smart Traffic Management System” Model to reduce traffic congestion and improve road safety. Materials Required: - Cardboard or thermocol base - Black chart paper (for roads) - Toy cars - Traffic lights (LEDs – red, yellow, green) - Arduino UNO / Micro:bit (optional) - IR sensors or ultrasonic sensors - Jumper wires - Breadboard - Battery or power bank - Glue, scissors, markers - Small buildings or trees for decoration																		

Reference:

- [Arduino Official Website](https://www.arduino.cc/)
- <https://www.youtube.com/watch?v=g62luGaBhK8&t=16s>

Guidelines

Project Theme:

Create a project based on:

“Smart Traffic Management for Safer Cities”

The model should show:

- Smart traffic signals
- Vehicle detection using sensors
- Automatic signal control
- Emergency vehicle priority system

Working Concept:

The AI system checks:

- Which road has more traffic
- Which lane is empty
- Emergency vehicle detection
- Automatic signal timing

The signal changes automatically depending on vehicle density.

Process:

Step 1:

Prepare the road layout using black chart paper.

Step 2:

Create traffic lights using LEDs.

Step 3:

Place toy cars on different roads.

Step 4:

Add IR or ultrasonic sensors near traffic lanes.

Step 5:

Connect sensors and LEDs to Arduino

Step 6:

Demonstrate AI decision-making:

- More vehicles → Longer green light
- Less traffic → Short green light

- Ambulance detected → Immediate green corridor
- No vehicles → Red light skipped

Prototype Idea:

Create a smart city traffic setup showing:

1. Smart Roads
2. AI Traffic Signals
3. Sensor Detection System
4. Emergency Vehicle Route
5. Automated Signal Control

Design Tips:

- Use proper road markings and signals
- Arrange wiring neatly
- Add labels and arrows explaining traffic flow
- Decorate with buildings, trees, and smart city elements
- Keep the model organized and easy to explain

Example Slogans:

“Smart Traffic, Safe Cities.”

“AI for Better Urban Mobility.”

Learning Outcomes:

- To understand the basics of Artificial Intelligence and automation
- To learn about sensors and smart traffic systems
- To develop problem-solving and model designing skills
- To understand how AI supports sustainable urban development and smart cities

OR

Activity 2

Create a “Smart Irrigation System” Model to demonstrate automatic watering using sensors.

Materials Required:

- Arduino UNO / ESP32
- Soil Moisture Sensor
- Water Pump

- Pipes or straws
- Small plants or artificial plants
- Breadboard and jumper wires
- Battery or power supply
- Cardboard base
- Glue, scissors, and labels

Reference:

- [Arduino Official Website](https://www.arduino.cc/)
- <https://www.youtube.com/watch?v=P6kr7QW56cU>

Guidelines:

Project Theme:

Create a project based on:

“Smart Water Management for Sustainable Living”

The model should show:

- Soil moisture detection
- Automatic watering system
- Water conservation techniques
- Smart farming technology

Working Concept:

The sensor checks soil moisture levels:

- Dry soil → Water pump turns ON
- Wet soil → Water pump turns OFF

The system helps reduce water wastage and improves irrigation efficiency.

Process:

Step 1:

Prepare a garden or farm model using cardboard.

Step 2:

Place plants and connect pipes or straws for water flow.

Step 3:

Insert the soil moisture sensor into the soil area.

Step 4:

Connect the sensor and water pump to the Arduino board.

Step 5:

Program the system for automatic watering control.

	Step 6: Label all components neatly and explain the working process. Prototype Idea: Create a smart irrigation setup showing: 1. Farm or Garden Area 2. Soil Moisture Sensor 3. Water Pump System 4. Automated Irrigation Pipes 5. Smart Water Management Design Tips: ● Use green and blue eco-friendly themes ● Arrange components neatly and safely ● Add arrows showing water flow ● Use proper labels and captions ● Keep the project clean and easy to demonstrate Example Slogans: “Save Water, Save Life.” “Smart Irrigation for Sustainable Farming.” Learning Outcomes: ● To understand automation and sensor-based systems ● To learn smart water conservation techniques ● To develop awareness about sustainable farming and irrigation ● To understand how AI and IoT technologies support smart environmental management systems <u>Assessment Criteria</u>
--	--

		Criteria	Marks	Description
		Creativity & Model Design	2	Creative and neat presentation of the traffic management system Or Creative and neat presentation of the smart irrigation system
		Concept Understanding	1	Clear understanding of AI automation and traffic control Or Clear understanding of sensors, automation, and water management
		Presentation & Labeling	1	Proper labeling, explanation, and working demonstration
		Relevance to SDG 2	1	Project clearly relates to Sustainable Cities & Communities
7.	PAT	Theme: SDG Goal 11 – Sustainable Cities and Communities <u>Learning Objective:</u> 1. To understand the role of physical activity in building healthy, sustainable communities. 2. To promote awareness of fitness habits that reduce environmental impact. 3. To connect local infrastructure (parks, cycling paths, open gyms) with physical well-being. <u>Instructions</u> • Complete the tasks neatly in your A4 sheets. • Paste photos or draw illustrations wherever necessary. • Use coloured pens, labels, and headings to make your work attractive. <u>Material Required</u> • A3 sheets, Pen, scale, colours • Printouts or photos (optional) • Access to a park/open area for one task • Old magazines/newspapers for cuttings (optional) <u>Task 1 – Poster: “Fit Cities, Green Cities”</u> Create a poster showing: • Eco-friendly exercises (walking, yoga in parks, cycling to school) • Use slogans like: ○ “Walk More, Drive Less!” ○ “Fit People = Fit Planet” • Include images/drawings of community parks, cycle lanes, and group workouts. • Add local proverbs, folk symbols or drawings from Arunachal Pradesh & Meghalaya (Ek Bharat Shreshtha Bharat).		

		Task 2 – My 7-Day Activity Challenge Track and record your own physical activity for 7 days on an A3 size sheet. You can include: • Walking distance • Number of steps • Minutes spent on yoga, sports, or exercise 🕒 Use a step counter app or estimate. ✍️ Make a small table with Day-wise record Learning Outcomes • Promote physical activity as a tool for personal health and environmental sustainability • Enhance data handling and observation skills • Understand the importance of shared green spaces in sustainable cities • Encourage regular physical activity as a life skill Assessment Criteria (Total: 5 Marks) <table border="1"> <thead> <tr> <th>Criteria</th><th>Marks</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Data Collection & Accuracy</td><td>1</td><td>Proper recording of data in survey/activity tracking</td></tr> <tr> <td>Awareness & Application</td><td>1</td><td>Connects fitness with community health and sustainability</td></tr> <tr> <td>Creativity in Poster</td><td>1</td><td>Visually clear, creative slogans and eco-friendly messages</td></tr> <tr> <td>Neatness & Completion</td><td>2</td><td>Work is neat, colourful, and all tasks completed as instructed</td></tr> </tbody> </table>	Criteria	Marks	Description	Data Collection & Accuracy	1	Proper recording of data in survey/activity tracking	Awareness & Application	1	Connects fitness with community health and sustainability	Creativity in Poster	1	Visually clear, creative slogans and eco-friendly messages	Neatness & Completion	2	Work is neat, colourful, and all tasks completed as instructed
Criteria	Marks	Description															
Data Collection & Accuracy	1	Proper recording of data in survey/activity tracking															
Awareness & Application	1	Connects fitness with community health and sustainability															
Creativity in Poster	1	Visually clear, creative slogans and eco-friendly messages															
Neatness & Completion	2	Work is neat, colourful, and all tasks completed as instructed															
8.	ART & CRAFT	1. Lippan Art (make any 1 from these images) Required material : • Plywood or canvas board [size 12 inches diameter] • Fevicyl colours / acrylic color • Fevicyl mouldit air dry clay • Craft mirrors															

2. Gond art (make any 1 from these images)

Required material :

- A3 size sheet
- Fevicyl colours / acrylic color
- CD marker for outlining
