

Software Solution Requirements

We require an integrated Digital Library and Learning Management software platform with the following features:

1. Smart Library Solution

RFID-Based Library Management & Asset Tracking System

- RFID-enabled library management
- Asset tracking system
- Membership management
- Book issue/return/renewal management
- Cataloguing and accession management
- Inventory management
- OPAC (Online Public Access Catalogue)
- Reporting and analytics
- Barcode and RFID integration

2. Integrated Library Management System (ILMS) and Learning Management System (LMS)

Library Management Module

- Acquisition management
- Cataloguing
- Circulation management
- User management
- Digital repository
- OPAC search
- Reports and analytics

Learning Management Module

- User registration and authentication
- Course management
- Video learning platform
- Assessment and testing modules

- Certification management
- Progress tracking
- Discussion forums
- Role-based access management

3. Mobile Access Platform

- Android application
- iOS application
- Responsive web portal
- Mobile-friendly access to library and learning resources
- User dashboard and notifications

4. Analytics and Monitoring Dashboard

The platform should provide:

- Usage monitoring
- User engagement analytics
- Learning progress tracking
- Administrative dashboards
- Performance indicators
- MIS and reporting tools
- Exportable reports

5. AI-Enabled Features

The software should support:

- AI chatbot/virtual assistant
- AI-powered search
- Personalized content recommendations
- Adaptive learning pathways
- Career guidance and counselling tools
- AI-based analytics and report
